

To Whom it May Concern,

Recently I was informed of the National Association of Broadcasters campaign to limit XM's ability to provide quality "local" programming, including the traffic and weather stations. Although I do not live in an area where this programming directly affects me, I do travel to other cities in which these channels would prove helpful. On behalf of myself and other XM subscribers, I urge to reject NAB's petition 04-160 and support XM in providing this and other fine programming.

Thank You,  
Jenna Minaschek
